EXAMINER'S AMENDMENT

1. This application is in condition for allowance except for the presence of claims 21-31 directed to an invention non-elected without traverse. Accordingly, claims 21-31 have been cancelled.

The application has been amended as follows:

In the Claims:

The following change has been made to cancel non-elected claims; the election was made without traverse:

Claims 21-31 have been cancelled.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The Examiner agrees with Applicant's remarks, specifically:

"As clearly set forth at column 5, lines 1 to 5, and shown in Figure 5 of U.S. Patent No 5 609 073 the scoops 72 pump oil axially through passageway 73 and radially outward through needle bearings 53 to locations radially outboard of flanges 20 and 21. Therefore, the scoops 72 axially and, to some degree, radially outwardly scavenge the oil. This is contrary to the present invention.

Spooner et al.'s scoops 72 are not configured to convert their rotating energy into a pumping force capable of overcoming centrifugal effect. Furthermore, Spooner et al. clearly lacks any radially inwardly extending passages through which the oil could be pumped towards a central axis of the differential housing 11. Spooner et al.'s scoop and passage arrangement can

only provide axial and radially outward lubricant flow through the differential housing."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
